Project AutoApply Pro: Development Roadmap

This document outlines the phased development plan for the AI-powered career coach and job search application, prioritizing automated outreach as the foundation.

Phase 1: Foundation - Automated Outreach (V1)

Goal: Implement the core engine for targeted job application outreach.

- **Automated Email Drafting:** AI-powered generation of tailored emails based on user profile and job descriptions. [cite: 16, 17]
- **Scheduled Email Sending:** Implementation of a secure SMTP-based delivery system with rate-limiting to ensure deliverability.
- **Basic Job Tracking:** Core database setup to track application statuses (Sent, Pending). [cite: 31, 32]
- **Environment:** Secure credential management (App Passwords) and initial PostgreSQL database configuration.

Phase 2: Discovery & Intelligent Matching (V2)

Goal: Move from manual input to automated job discovery.

- **Job Aggregator Agents:** Develop scrapers/APIs to fetch relevant roles from LinkedIn and Indeed. [cite: 22, 23, 24]
- **AI Matching:** Use LLMs to analyze job descriptions against candidate skills to ensure high-quality matches.
- **Enhanced Tracking:** Advanced analytics on rejection reasons (ATS score, skill mismatch). [cite: 34, 35, 37, 38]

Phase 3: Portfolio & Resume Optimization (V3)

Goal: Comprehensive profile management and resume optimization.

- **Multi-Profile Management:** Support for distinct, tailored profiles (e.g., Java vs. Python focus). [cite: 8, 9, 10]
- **Portfolio Presentation:** GitHub-style interactive profile capabilities. [cite: 4, 5]
- **Resume Builder/Optimizer:** Integrated tools to align resumes with modern hiring standards. [cite: 12, 13]
- **ATS Score Checker:** Real-time feedback on resume visibility. [cite: 14, 15]

Phase 4: Advanced Career Coaching (V4)

Goal: Full-lifecycle career support and market intelligence.

- **Interview Preparation:** Company research and mock interview experiences. [cite: 41, 42, 46]
- **Market Insight Tools:** Data-driven analysis of trending skills to help users upgrade their profiles continuously. [cite: 49, 50, 52]
